

# DWA\_04.3 Knowledge Check\_DWA4

---

1. Select three rules from the Airbnb Style Guide that you find **useful** and explain why.

Use descriptive function names: This rule helps to understand what a function does at a glance, without having to read through the function body.

Keep lines of code short: This rule helps to avoid long, unreadable lines of code.  
I find these rules useful because they help to keep my code clean and easy to understand. This makes it easier to maintain and modify the code in the future.

Comments: This rule helps to explain why I am doing something in my code, which can be really helpful to other developers who are trying to understand my code.

---

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.

Use 2 space indentation- it takes some time to get used to the smaller indentation size so I have to change some of my existing habits.

Quotes- It can be confusing to remember which quote type to use in a particular language.

Using lowercase letters- it takes some time to get used to using lowercase letters throughout my code.
